PILLOW MENU

DRIFT OFF, REST UP

DOWN FEATHER PILLOW

Down feather pillows tend to make the softest pillows. They're nice and light, have a cool and airy feel to them, and are easy to shape.

LATEX PILLOW

Latex is anti-microbial and dust resistant. Although latex is quite naturally breathable, most manufacturers of these pillows make them with perforations in the material. This is to allow air circulation, and to encourage them to breathe. This prevents a build-up of moisture and heat in the pillow.

STANDARD MICROFIBRE PILLOW

Lightweight and good for those with allergies, microfibre pillows are easy to care for, and are easy to bend and scrunch to achieve the desired height. They are the most versatile, being a pretty good choice for most people, and are suited to a variety of sleeping styles.

MEMORY FOAM PILLOW

These pillows are made from a type of foam that can easily support your back and neck by conforming to your unique body shape. The memory foam "moulds" to your neck and head, creating a comfortable cradle for your head while you sleep. This option can even help relieve pain in your neck while you snooze away.

MEMORY FOAM CONTOURED PILLOW

These pillows are specially designed to relieve pain and pressure build-up to the head, neck or back. These pressure relief pillows can significantly increase comfort for those who experience problems using regular pillows.
